

Thank you very much for your attention and ability to heal people.

I had a laparoscopic surgery at the beginning of April After that I was weak and feel not well balanced. I had lack of energy, I was tired all the time. I had hemoroid since my surgery and lost blood each day. I came to the Vitality Oriental Therapy. Tina received me. The first treatment didn't stop the hemoroid. After it was even getting worse, but I was feeling a little better with my energy. The second treatment was immediately successful. I didn't suffer anymore from the hemoroid and I stopped bleeding. My energy came back and I regained confidence in my capacity.

Thank you very much for your attention and ability to heal people.
